

## DIY Masterpiece

You will need:

Styrofoam balls – there are many sizes to choose from.

An old book with the pages torn out.

Glue gun and glue sticks.

Paper puncher – we used a 1 ½ diameter punch.

Unsharpened pencil.

Wooden dowels, if desired.

Instructions:

1. Punch holes in the book pages, retaining the circles for the project.
2. Wrap a circle around the end of an unsharpened pencil.
3. Dot the circle with hot glue and press it into the Styrofoam circle.
4. Continue until the ball is covered.
5. If desired, push a dowel into the circle to create a “flower”.

***EveryStep Giving Tree has a large selection of vintage books that can be used for this project.***
