

Repurposed Glass Bottle

You will need:

Mod Podge
Food coloring
Foam paint brush
Glass bottles, jars or vases
Desired decorations

Instructions:

1. Thoroughly wash and dry the glass pieces. Wipe the exterior with rubbing alcohol for best paint adhesion.
2. Mix about $\frac{1}{4}$ cup of Mod Podge with enough food coloring to reach your desired hue.
3. Using the foam brush (it will help avoid brush strokes better than a bristle brush), apply several light coats of "paint," letting the piece thoroughly dry between coats.
4. Once dry, decorate the piece as desired.

EveryStep Giving Tree always has a large selection of bottles, glasses and jars. The pieces we used for this project were .99 each.
