

Shutter Inspiration

You will need:

Old shutters of any size

Spray paint, if desired

For our project, we also used a wall sconce and a wreath

Instructions:

1. Clean the shutters to remove dust and debris. You may like them as is, but if desired, give them a coat of paint and let dry completely.
2. For our project, we installed a rechargeable wall sconce. Assemble and attach according to package instructions.
3. We also used a self-adhesive hook to attach a wreath.

The possibilities of using old shutters as home décor are only limited by your imagination.

Attach small hooks to use as a jewelry organizer, use clothespins to attach photos, or even use a shutter as a shelf!
