

## Summertime Server

### You will need:

Basket

Paint

Tissue paper (or paper napkins)

Mod Podge

Brush

### Instructions:

1. Paint the basket interior and any other spaces you would like to remain exposed with a color that coordinates with your tissue paper.
2. When paint has dried, brush Mod Podge onto the basket and then apply tissue paper. Don't worry if it tears. Just cover it with another piece of tissue. After tissue paper is applied, add another coat of Mod Podge on top of it.
3. When completely dry, carefully tear off the edges of the tissue around the base of the basket. You could also use a sharp blade to do this.
4. Apply another coat of Mod Podge, smoothing any rough edges and let dry completely.

EveryStep Giving Tree has a large selection of baskets like the one we used for our project!
