

## **Tea Cup Bird Feeder**

### **Items needed:\***

Tea cup and saucer

Glue suitable for ceramics

Stair rail or other wooden or metal pole, about 4 feet high

Bird seed

### **Instructions:**

1. Glue the tea cup to the saucer. Let dry for several hours, or according to package directions.
2. Push the pole into the ground and ensure it is level.
3. Glue the fused tea cup and saucer to the rail or pole. For better adhesion, place glue on the top of the pole and on the bottom of the saucer.
4. Hold the tea cup and saucer in place until it can balance on its own. This may take several minutes.
5. Let the glue dry according to package directions.
6. If desired, add extra glue around the area where the pole and saucer are connected for extra strength.
7. Fill cup with bird seed.

*\*We purchased the glue and stair rail at the Habitat for Humanity ReStore for less than \$4. Visit EveryStep Giving Tree for a large selection of tea cups, which changes daily.*
